PORTFOLIO

A portfolio of some of my work can be found below and at danboudet.com. You can also find these projects starred in my GitHub repositories: github.com/dboudet

Applicant Assistant

Fully-functional applicant tracking system deployed to AWS (with Firebase authentication). Designed and built **in 10 days** as my Boca Code final project.

- RDS: MySQL database
- EC2: Node/Express API
- S3: React front end
- Firebase storage: User file uploads (resumes and headshots)
- Demo login – email: atsdemo2@danboudet.com | password: ss2384H%r4V83

Portfolio Website

- React
- Material-UI

Futurama Character Finder

Quick and simple interface to display Futurama character info

- React
- Connected to SampleAPIs.com

Wall App (API | UI)

Application to post and display messages (local only - in progress, but functional)

- MongoDB
- Node/Express API
- React
- React Bootstrap/Sass
- SendGrid email verification
