PROFESSIONAL SUMMARY

Cloud Software Engineer focused on designing and building cloud-native applications that are practical, efficient, scalable, and maintainable. I enjoy solving complex technical problems with a systems-level perspective, combining thoughtful solution design, attention to detail, and strong collaboration across engineering, product, and business teams.

EXPERIENCE

Software Engineer, SMArtX Advisory Solutions — 2021–Present

- Design and develop cloud-native software supporting financial advisors and wealth managers using AWS managed services.
- Support the squad tech lead and periodically lead initiatives and projects.
- Collaborate with other engineers, architects, and product stakeholders to deliver performant, stable applications that meet or exceed requirements.
- Build REST APIs using lightweight, highly testable Python Lambda functions and API Gateway.
- Design and implement ETL pipelines and data synchronization workflows.
- Modernize legacy .NET APIs hosted on EC2/ECS by migrating workloads to Python Lambda functions behind API Gateway, reducing cost and simplifying operational complexity, while increasing maintainability.
- Designed and implemented MSSQL to DynamoDB migrations, including full backfill processes and incremental event-driven synchronization.
- Provision AWS infrastructure consistently and reliably across multiple environments using Terraform.
- Develop and maintain GitHub Actions CI/CD pipelines, automating testing, packaging, and deployment of various libraries and applications.
- Implement monitoring, logging, and operational visibility using CloudWatch while managing resource permissions with IAM.

Director of Marketing & Research (Previously Interactive Manager), Cultural Council for Palm Beach County — 2013–2021

- Managed AWS-hosted web platforms and collaborated with development partners on application enhancements.
- Directed website strategy, analytics, and digital marketing initiatives while leading cross-functional projects and agency relationships.

Cox Media Group / The Palm Post — 2006–2013

- Held various technical roles providing web development, analytics, digital marketing, and ad trafficking support for large-scale web properties.
